**The energy transition
challenge to a
low-carbon future**

RAPID SWITCH

Spring 2020 (ENE/ENV/EGR 372)

Worried about **Climate Change?**

Wondering how to cut **GHG emissions** to save our planet?
The entire world must rapidly switch to low-carbon energy services.
It won't be easy, but it is essential.

Learn How!

This course examines the decarbonization challenge through multidisciplinary lenses: technical, economic, socio-political, business, and dynamic systems. Develop the skills with your team to analyze and design your own energy-system transformation case-study.
