

Steven Lee Meisler

Curriculum Vitae

Steven is a cognitive developmental neuroscientist who uses multimodal neuroimaging (fMRI and DWI) and psychocognitive evaluations to study neural bases of reading abilities, disabilities, and intervention in children. He is also broadly interested in better understanding the relationship between brain structure and function, and how these associations arise in development and vary with cognitive abilities and disabilities. Steven received his bachelor's and master's degrees in bioengineering from the University of Pennsylvania in 2017 and 2018, and will complete his PhD from Harvard in Speech and Hearing Bioscience and Technology in May 2024.

Education

- 2019–2024 **PhD in Speech and Hearing Bioscience and Technology**, *Harvard University Division of Medical Sciences*, Cambridge, MA
(anticipated) Secondary Field in Mind, Brain & Behavior
Dissertation: "White Matter Structural Correlates of Reading Abilities, Disabilities, and Intervention" - Advisor: John Gabrieli, PhD
- 2017–2018 **MSE in Bioengineering**, *University of Pennsylvania*, Philadelphia, PA, 3.79/4
Thesis: "Evaluating the Effect of Intracranial EEG Data Cleaning on Univariate and Multivariate Classifier Performance" - Advisor: Michael Kahana, PhD
- 2013–2017 **BSE in Bioengineering**, *University of Pennsylvania*, Philadelphia, PA, 3.70/4
magna cum laude
Minors in Mathematics, Jazz Studies, and Engineering Entrepreneurship

Research Positions

- 2024– **Incoming Postdoctoral Fellow**, *Lifespan Informatics & Neuroimaging Center*, Hospital of the University of Pennsylvania (PI: Theodore Satterthwaite, MD), NIH T32 Trainee
- 2019–2024 **PhD Candidate**, *Gabrieli Lab*, MIT Brain and Cognitive Science (PI: John Gabrieli, PhD), NIH T32 Trainee and F31 Fellow
 - Using advanced diffusion weighted imaging models to study white matter microstructural correlates of reading in large pediatric cohorts.
 - Studying longitudinal microstructural changes in white matter associated with response to reading intervention.
 - Examining contributions of right hemispheric activity to reading improvement after intervention among dyslexic children.
- 2018–2019 **Clinical Research Coordinator**, *Laboratory for Neuroimaging of Coma and Consciousness*, Massachusetts General Hospital (PI: Brian Edlow, MD)
 - Used machine learning to test if EEG and MRI biometrics in the ICU can predict recovery outcomes from traumatic brain injury.
 - Was responsible for screening patients, as well as submitting and maintaining regulatory documentation.

Ⓜ mastodon.online/@smeisler • Ⓛ [Smeisler](#)

- 2017–2018 **Graduate Research Assistant**, *Computational Memory Lab*, University of Pennsylvania (PI: Michael Kahana, PhD)
- Researched efficacy of various data preprocessing methods on classification of neural activity during memory tasks
 - Created a Python-based GUI that visualizes and annotates EEG signals for analysis in a multi-site DARPA-funded clinical study

* Denotes Equal Authorship

 2017 ***magna cum laude***, University of Pennsylvania
 2015 – 2017 **Dean's List**, University of Pennsylvania

Skills

1 - Basic Knowledge; 5 - Expert

	Level	Skill	Comments
Computing:		Python	<i>Comfortable with data analysis, Jupyter, and Python-based software development</i>
		MATLAB	<i>Can use MATLAB if required, but I prefer Python and terminal tools</i>
		Bash / Terminal	<i>Proficient in scripting and parallelizing jobs with HPC schedulers</i>
		R	<i>It's a work in progress...</i>
		L <small>A</small> T <small>E</small> X	<i>Prefer to write papers using either Overleaf or Google Docs (+Zotero)</i>
Methods		DWI	<i>Familiar with basic tensor and advanced diffusion modeling approaches</i>
		fMRI	<i>Familiar with several univariate and multivariate analytical approaches</i>
		EEG Time Series Analysis	<i>Master's thesis heavily employed ML-based analysis of continuous time-frequency decomposition</i>

Other Skills

Study Coordination	EPIC, RedCap, IRB	Open Science	GitHub, BIDS-apps
---------------------------	-------------------	---------------------	-------------------

Verified Peer Reviews

- ***Frontiers in Neuroscience***

Professional & Service Affiliations

- 2021–Present Member, Organization for Human Brain Mapping
2019–Present Volunteer, Virtual Bedside Concerts, Mass General Brigham
2019–Present Member, Cognitive Neuroscience Society
2019–2021 Co-Chair, American Congress of Rehabilitation Medicine, Arts & Neuroscience Cognition Task-Force

Teaching Experience

Teaching Fellow, Harvard University

- Falls How Music Works: Engineering the Acoustical World
2021-2023
2020 Undergraduate Mentoring Certification, Faculty of Arts & Science, Division of Science

Teaching Assistant, University of Pennsylvania

- Fall 2017 Differential Equations & Linear Algebra
Fall 2016 Bioengineering Signals & Systems
& 2017

DEJI Experience

- 2024 University of Rhode Island Diversity and Inclusion Badge Program

Software

FSuB-Extractor

(Python/Bash) https://github.com/smeisler/fsub_extractor

This is a flexible open-source software toolbox for finding components of white matter bundles that connect to functional regions of interest. Studying these **Functional Sub-Bundles** (FSuBs) could lead to more precise studies relating brain structure, function, and behavior.
